

# I-15 NOW: ROOM TO MOVE

**Travelers through the I-15 NOW project area are noticing there is a lot more room to move now that the reconstruction is nearing completion.**

- Four travel lanes in each direction (31st Street to 12th Street)
  - Wider bridges accommodate additional turn and travel lanes under bridges
- Three travel lanes in each direction (12th Street to 2700 North)
- Reconstructed interchanges at 31st, 24th, 21st, and 12th streets; and at 400 and 2700 North
  - Longer on- and off-ramps that allow cars and trucks entering I-15 adequate room to accelerate to freeway speeds before entering traffic
- An interconnected traffic signal system helps move vehicles more efficiently through the area
- Lanes in a few locations that begin at an on-ramp and extend to the next off-ramp making the transition to and from the freeway safer and smoother
